

FUTURE EVENTS

We will have our regular business meeting for January on Monday night, the 28th, at 7 p.m. at the Matanuska Building. We will need to finalize our entry in the Fur Rendezvous Parade, and we are still looking for someone to put together a skating party - so please come!

Fur Rendezvous Parade - Saturday February 16, 1980. Keep posted for a time to meet for breakfast and then to caravan to the parade staging area. We are also considering gathering after the parade for lunch as we did last year, so come along, bring the family, and have a fun day.

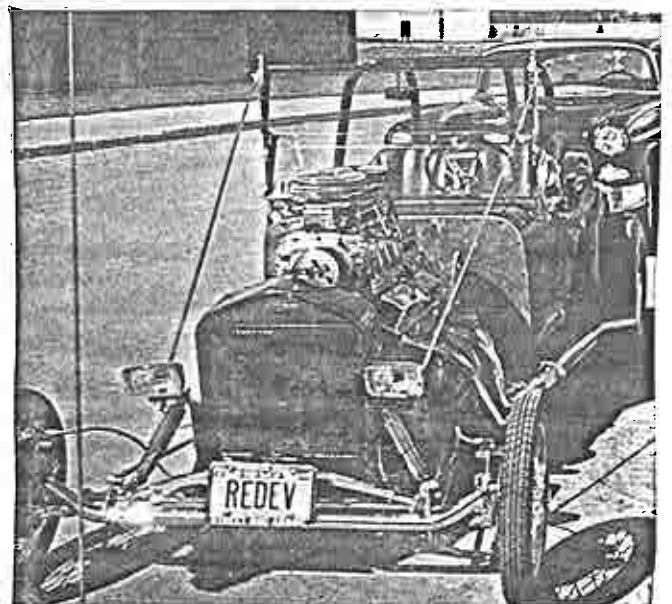

Plans are going ahead full bore for our first annual Midnight Sun Autorama May 23-25, 1980, at the National Guard Armory. Ed Park and Fritz Livesay are Co-Chairmen with Harold Rounds, advertising and judging; Frank Brookshire, T-shirts; Wally Graham, entries; Glen Whitson, concessions; Evelyn Livesay, admissions; and Ed and Harold, awards. If there is any particular committee you would like to work on, please give any of these members a call and volunteer. Remember, you will all need to help, so pitch in early.

The second annual Anchorage Automobile Show and Shine on the Park Strip has been set for July 19, 1980. We all had a fantastic time last year, and this year should be better.

MEMBER PROFILE

Harold Rounds is one of our more famous men around town because he is Harold of Harold's Appliances, the Maytag Distributor, and that is probably why he has such a fabulous roadster. He is never busy repairing Maytags and has all that time to work on his 1932 Austin Bantam with a tube chassis, blown Chevy power through a Chevy transmission and rear end. Harold keeps the bugs out of his eyes with a 'T' windshield. The car is a consistent show winner wherever it goes; in fact, at the Finger Lake rod run last May Harold won the hard luck trophy with it.

Harold came to Alaska at the age of ten and besides growing up with cars, he married a beautiful person by the name of Evelyn, who has given them four fine children. They all work in the appliance business and are a street rod family. You will see them this summer on the street enjoying street rodding.
